Summary

Final-year Information Science Engineering student passionate about Software Development and Data Analytics. Interested in building reliable and scalable software systems while solving real-world problems through technology and data-driven approaches. Eager to apply technical, analytical, and problem-solving skills in Software Development Engineer or Data Analyst roles.

Education

BE - Information Science and Engineering, BMSIT&M, Bengaluru | 2022-26

Grade - 8.22 / 10

PUC - PCMB, BEST PU College, Chikkaballapur, Karnataka | 2020-22

Grade - 86.66%

SSLC, Sri BGS High School, Chikkaballapur, Karnataka | 2020

Grade - 85.60%

Skills

Programming Languages : Java, Python, SQL

Core CS Concepts : Basic foundations in DSA, OOPS, DBMS, CN and OS

Databases : MySQL (SQL), Firebase (NoSQL basics)

Web Development : Frontend & Backend Development Basics, Authentication & Authorization Fundamentals

Tools & Exposure : Git, GitHub, VS Code, Power BI, Tableau, MS Excel, Postman, GCP basics, AI-assisted development tools, Data Analysis, Dashboard Creation, Prompt Engineering, working with different LLMs

Soft skills : Adaptability, Problem Solving, Debugging, Analytical Thinking, Team Collaboration

Experience

Software Development Engineer Intern

SS Infinite Group | 3 Months Internship

- Assisted in developing frontend & backend modules and implementing application logic for internal software tools.
- Worked with structured data formats such as JSON and integrated REST APIs for application functionality.
- Debugged and optimized existing code components to improve reliability and performance.
- Collaborated with team members during development and testing phases to identify and resolve functional issues.

Key projects worked on: Goodkart, Goodgide

Projects

Navigation In OS Using Gestures

- Developed a real-time hand gesture recognition system using OpenCV and MediaPipe.
- Implemented real-time gesture detection using **OpenCV and MediaPipe**.
- Designed a feature extraction pipeline from video frames to interpret user gestures.
- Demonstrated application of machine learning concepts in human-computer interaction.

Tech Stack: Python · OS Interaction · OpenCV · MediaPipe · Machine Learning (basic)

Library Management System

- Built a library management application to manage book inventory, users, and borrowing records.
- Implemented CRUD operations using SQL for book and user management.
- Designed relational database schema for efficient data storage and retrieval.
- The system supports multiple users, secure authentication, real-time updates, and scalable backend APIs.

Tech Stack: Python · MySQL · Authentication - Authorization

Certifications

- Google Cloud Career Launchpad Data Analytics track.
- IBM Skills Build certificate of Getting Started with Data.
- Data Analyst Training - Infosys Foundation (ICT Academy).

Achievements & Leadership

- Led two academic software project teams (4–6 members), ensuring on-time delivery through clear task breakdown, technical coordination, and regular progress tracking.
- Served as Captain of the school Kho-Kho team and represented the district in competitions.
- Led team to first place victory as captain in intercollege Kho-Kho championship.
- Organized and led a college coding events and workshops in college clubs.
